SUMMARY

Equipment-finance professional who also builds the tooling the desk runs on. At Mitsubishi HC Capital I carry a vendor-sales book funding **200% of new-business target**, co-designed a **predictive collections scorecard** now in rollout, and reverse-engineered manufacturer lease and subsidy math into a quoting engine that matches the industry-standard lease-math engine (**TValue**) to the penny. I pair credit, amortization, and portfolio fluency with the rare ability to ship the software that operationalizes it.

EXPERIENCE

Associate Account Manager, Equipment Finance

Sept. 2025 – Present

Mitsubishi HC Capital Canada

Burlington, ON

- Carry a vendor-sales equipment-finance book, funding **200% of new-business target (\$4M against \$2M)** across construction and transportation assets.
- Designed and am implementing a **predictive collections scorecard** with the credit and portfolio teams: a dual-track model that auto-triages low-risk accounts and scores the rest by recovery priority across about **\$17–18M of assets in recovery**, where **each 1% of recovery improvement is worth about \$1M**; owned the business case, won approval to proceed, and am driving the rollout.
- Reverse-engineered each manufacturer's lease and subsidy math into a quoting engine hitting **exact penny-parity with TValue**, replacing **13 abandoned Excel calculators** across all 11 product lines and giving the desk one trusted pricing tool.
- Built an **AI document-validation prototype** for deal-funding review and carried it through the company's first internal innovation review; it now runs as a live service that audits real deal packages unattended.

Junior Web Developer

May 2021 – Jun. 2022

Giftcash Inc.

Remote

- Built payout and gift-card valuation services on a **Node.js / AWS Lambda** stack, automated balance verification across providers, and stood up **CI/CD** for rapid, reliable releases.

SKILLS

Finance & Credit: Equipment & lease structuring, credit analysis, amortization math (PMT / PV / FV / RATE / IRR, TValue-validated), manufacturer subsidy & blended-rate modeling, credit-scorecard & recovery modeling, portfolio & variance analysis

Tools: TValue, Excel (advanced), InfoLease, Power BI, SQL

Engineering: TypeScript, Python, Next.js / React, Node.js, PostgreSQL, multi-agent automation, payments integrations (Square, Stripe)

SELECTED PROJECTS

Personal Agentic OS · multi-agent automation that runs real document workflows | *Python, TypeScript, Claude 2026*

- Built and run a **self-hosted multi-agent system** that automates power-of-attorney, asset-registration, and pre-funding document packages: email-triggered services that reply within minutes with complete, ready-to-file documents.

Solstice Pilates · multi-tenant booking & payments platform | *Next.js, Prisma, Square*

2025 – Present

- Sole engineer on a live payments platform; found and fixed **money-losing production bugs**, including a double cents conversion saving a **\$50 discount as \$5,000** and tax under-reported on subscription renewals.

EDUCATION

McMaster University

Hamilton, ON

MEng, Computing & Software (in progress)

Sept. 2025 – Dec. 2026

McMaster University

Hamilton, ON

BASc (Honours), Computer Science

Sept. 2018 – Nov. 2024
