SUMMARY

Software engineer who builds the tooling a finance desk actually runs on: a quoting engine matching TValue to the penny, a booking-and-payments platform processing real revenue, and a multi-agent system automating funding-deal documents. Equipment-finance domain fluency from Mitsubishi HC Capital that most engineers don't have.

EXPERIENCE

Associate Account Manager, Equipment Finance

Sept. 2025 – Present

Mitsubishi HC Capital Canada

Burlington, ON

- *Hybrid role: a sales book plus the desk's internal software (quoting, document automation, collections analytics).*
- Rebuilt **13 abandoned Excel calculators** as one Next.js / React web app covering all 11 product lines; reverse-engineered each manufacturer's lease and subsidy math and pinned **penny-parity with TValue** under 72 automated tests.
- Built an AI document-validation prototype (OCR + ML + rules) for deal-funding review and took it through the company's first internal innovation review; it now runs live, auditing deal packages unattended.
- Designed a predictive collections scorecard with the credit and portfolio teams that ranks recovery work across roughly **\$17–18M** of assets; each one-point lift in the portfolio recovery rate is worth about **\$1M**. Owned the business case and won approval.
- Also carry the desk's sales book: funded **\$4M against a \$2M monthly target**, beating quota every month since month two.

Junior Web Developer

May 2021 – Jun. 2022

Giftcash Inc.

Remote

- Migrated a legacy **Python / Django monolith to Node.js on AWS Lambda** and tuned PostgreSQL with indexes, caching, and query rewrites that killed the sequential scans on the gift-card lookup.
- Automated gift-card balance verification with a **Puppeteer + Axios** pipeline and stood up Jenkins / GitHub Actions CI/CD; no more manual checks or releases.

PROJECTS

Solstice Pilates · multi-tenant booking & payments SaaS | *Next.js, Prisma, Neon, Square*

2025 – Present

- Designed and shipped the entire platform **solo**: scheduling with waitlists, Square payments and recurring memberships, a 23-page admin portal. It runs live operations: **500+ registered users, \$20K+ CAD processed**, 1,600+ automated tests.
- Found and fixed money-losing production payment bugs: a double cents conversion saving a \$50 discount as **\$5,000**, a 4x undercount in ad-conversion reporting, and tax under-reported on subscription renewals.

Personal Agentic OS · multi-agent automation platform | *Python, TypeScript, Claude, systemd, Tailscale*

2026

- Built and operate a self-hosted multi-agent platform: **30+ scheduled automations** and email-triggered workers that turn funding-deal packages into ready-to-file documents in minutes, every worker sandboxed in a kernel-namespaces jail.

TECHNICAL SKILLS

Languages: TypeScript, Python, SQL, Java, C, Swift

Financial & Domain: Equipment & lease finance, amortization & subsidy math (TValue-validated), credit scorecards

Backend & Web: Next.js, React, Node.js, Prisma, Tailwind, PostgreSQL (Neon), Redis, Vercel, TDD, CI/CD

AI / Agentic: Multi-agent orchestration, RAG + local LLM serving (Ollama), Whisper

EDUCATION

McMaster University

Hamilton, ON

MEng, Computing & Software (Year 1 complete)

Sept. 2025 – Dec. 2026

McMaster University

Hamilton, ON

BASc (Honours), Computer Science

Sept. 2018 – Nov. 2024
