SUMMARY

Equipment-finance professional who underwrites and structures multi-million-dollar leases and loans. I spread customer financial statements, run credit analysis, and structure FMV, capital, and vendor-finance deals, currently funding **200% of monthly quota** (\$4M against a \$2M monthly target) at Mitsubishi HC Capital. I also build the tools the desk runs on, from a validated quoting application to a predictive default-risk model, and bring a software engineer's rigor to credit and portfolio work.

EXPERIENCE

Associate Account Manager, Equipment Finance

Sept. 2025 - Present

Mitsubishi HC Capital Canada

Burlington, ON

- Funded **\$4M against a \$2M monthly target (200% of quota)** in April and May 2026, exceeding funding quota every month since my second month in the role.
- Underwrite and structure equipment leases and loans (FMV, capital, and vendor-finance structures) across construction, transportation, and material-handling; spread customer financial statements and compute coverage, net-investment, and residual metrics for credit decisions.
- Own the end-to-end lease-transfer desk, managing deal structuring, documentation, and funding through to settlement.
- Contributed **Python** modeling to a cross-functional predictive default-risk model and built **Power BI** portfolio and variance analyses supporting credit and collections decisions.
- Built a validated quoting application consolidating **13 manufacturer-specific pricing models** into one tool used on live deals, eliminating a class of manual rate-calculation errors.

ENGINEERING

DealFlow Sandbox (event-driven microservices) | .NET, RabbitMQ, PostgreSQL, Docker

2025

- Modeled an equipment-finance pipeline as decoupled **.NET** microservices, replacing a 15–20 minute manual party-exposure lookup with a sub-second API returning total exposure, delinquency, and document requirements.

Skomp Studio (multi-tenant SaaS, founded) | Next.js, Prisma/Neon, Square, AWS

2025 - Present

- Built a multi-tenant TypeScript SaaS processing live **Square** payments for a paying studio, with row-level tenant isolation, idempotent billing reconciliation, and ~800 tests gating releases.

EDUCATION

McMaster University

Hamilton, ON

Master of Engineering (MEng), Computing and Software

Sept. 2025 - Dec. 2026 (expected)

- Year 1 complete with **A+** in Simple Type Theory and Microservices-Oriented Architectures.

McMaster University

Hamilton, ON

Bachelor of Applied Science (BASc), Computer Science

Sept. 2018 - Nov. 2024

SKILLS

Finance: Credit analysis & adjudication, financial-statement spreading, DSCR & net-investment, lease/loan structuring (FMV, capital, vendor finance), residual value, amortization modeling, portfolio & delinquency analysis

Tools: Power BI, Excel modeling, InfoLease, Salesforce

Engineering: Python, TypeScript, SQL, .NET, predictive risk modeling, automation of credit and funding workflows
