SUMMARY

Equipment-finance professional and full-stack/ML engineer. I underwrite and structure multi-million-dollar equipment leases while shipping production software — multi-tenant SaaS, AI products, and internal finance automation. Currently funding **200% of monthly quota** at Mitsubishi HC Capital and completing an MEng in Computing & Software. Targeting roles at the intersection of finance and engineering (fintech, quant-dev, finance platforms).

EDUCATION

McMaster University <i>Master of Engineering (MEng), Computing and Software</i> • Year 1 complete with A+ in Simple Type Theory and Microservices-Oriented Architectures.	Hamilton, ON Sept. 2025 - Dec. 2026 (expected)
McMaster University <i>Bachelor of Applied Science (BASc), Computer Science</i>	Hamilton, ON Sept. 2018 - Nov. 2024

EXPERIENCE

Associate Account Manager, Equipment Finance <i>Mitsubishi HC Capital Canada</i> • Funded \$4M against a \$2M monthly target (200% of quota) across April and May FY26, and have exceeded funding quota every month since my second month in the role. • Underwrite and structure equipment leases and loans (FMV, capital, vendor-finance) across construction, transportation, and material-handling; spread customer financial statements and compute coverage and net-investment metrics for credit decisions. • Built internal automation tools that replaced manual Excel and credit workflows — including a web quoting app that consolidated 13 manufacturer-specific calculators into one validated tool — cutting per-deal turnaround from minutes to seconds.	Sept. 2025 - Present Burlington, ON
Junior Web Developer <i>Giftcash Inc.</i> • Migrated a legacy Python/Django monolith to a Node.js AWS Lambda serverless architecture and optimized PostgreSQL indexing and caching, reducing response times by 20% . • Automated balance-verification workflows with Puppeteer and built GitHub Actions CI/CD pipelines, cutting deployment times by 30% .	May 2021 - Aug. 2022 Remote

PROJECTS

Skomp Studio (multi-tenant fitness-studio SaaS) <i>Next.js, React, Prisma/Neon, Square, AWS</i> • Built a ~100K-line multi-tenant TypeScript SaaS (122 API routes, hexagonal architecture, row-level tenant isolation, ~800 unit tests) running a live paying studio on Square payments and AWS SES/SNS .	2025 - Present
Applify AI (AI résumé-tailoring SaaS) <i>Next.js, PostgreSQL, Stripe, LLM APIs</i> • Shipped an AI résumé-tailoring product to ~150 paying users , generating ATS-optimized, job-targeted résumés with subscription billing and authenticated user data.	2025 - Present
Personal Agentic OS (multi-agent automation) <i>Claude API, Python, RAG, FastAPI</i> • Engineered a multi-agent automation system across 4 machines — retrieval-augmented knowledge vaults, email-triggered document workflows, scheduled briefings, and deterministic publish gates — to compound research and ops work.	2026
DealFlow Sandbox (event-driven microservices) <i>.NET, RabbitMQ, PostgreSQL, Docker</i> • Modeled an equipment-finance pipeline as decoupled .NET microservices over RabbitMQ /MassTransit, replacing a 15–20 minute manual exposure-lookup with a sub-second API call.	2025

TECHNICAL SKILLS

Languages: TypeScript, Python, SQL, C/C++, Java, Swift, JavaScript, Bash
Frameworks: Next.js, React, Node.js, FastAPI, .NET / ASP.NET Core, Prisma, React Native, PyTorch
Data & Cloud: PostgreSQL (Neon), MongoDB, AWS, Vercel, GCP, Docker, RabbitMQ, GitHub Actions
AI & Finance: Claude API / agentic workflows, RAG & vector search, MCP; credit analysis, financial-statement spreading, lease/loan structuring, Power BI
