SUMMARY

Software engineer who builds the tooling a finance desk actually runs on: a quoting engine matching **TValue** to the penny, a booking-and-payments platform processing real revenue, and a multi-agent system automating funding-deal documents. Equipment-finance experience at Mitsubishi HC Capital gives me domain fluency most engineers don't have.

EXPERIENCE

Associate Account Manager, Equipment Finance

Sept. 2025 – Present

Mitsubishi HC Capital Canada

Burlington, ON

- Replaced **13 abandoned Excel calculators** with one **Next.js / React** web app spanning all 11 product lines, reverse-engineering each manufacturer's lease and subsidy math to hit **exact penny-parity with TValue** on every test deal.
- Built a working **AI document-validation prototype** for deal-funding review, carried it through the company's first internal innovation review, and now run it as a **live email service auditing real deal packages unattended**.
- Designed a **predictive collections scorecard** with the credit and portfolio teams, prioritizing about **\$17–18M of assets in recovery** where **each 1% of recovery improvement is worth about \$1M**; owned the business case and won approval.
- Carry an equipment-finance sales book alongside the engineering work: funded **\$4M against a \$2M monthly target (200%)** and have **exceeded quota every month since my second month**.

Junior Web Developer

May 2021 – Jun. 2022

Giftcash Inc.

Remote

- Migrated a legacy **Python / Django monolith to Node.js on AWS Lambda** and tuned **PostgreSQL** with indexes, caching, and query rewrites, removing the sequential scans behind the gift-card lookup flow.
- Automated **gift-card balance verification** with a **Puppeteer + Axios** pipeline and stood up **Jenkins / GitHub Actions CI/CD**, replacing manual checks and releases.

PROJECTS

Solstice Pilates · multi-tenant booking & payments SaaS | *Next.js, Prisma, Neon, Square*

2025 – Present

- Designed and shipped the **entire platform solo**: scheduling with waitlists, **Square** payments and recurring memberships, and a 23-page admin portal; runs live operations with **500+ registered users, \$20K+ CAD processed**, and **850+ automated tests**.
- Found and fixed **money-losing production payment bugs**: a double cents conversion saving a \$50 discount as **\$5,000**, a 4x undercount in conversion reporting, and tax under-reported on subscription renewals.

Personal Agentic OS · multi-agent automation platform | *Python, TypeScript, Claude, systemd, Tailscale*

2026

- Built and operate a **self-hosted multi-agent platform** (always-on Linux server, two Macs, an iPhone): **30+ scheduled automations** and email-triggered workers that validate funding-deal packages and produce ready-to-file documents **in minutes**; workers run in kernel-namespaces and an **autonomous overnight pipeline** builds and tests projects behind a **12-check publish gate**.

TECHNICAL SKILLS

Languages: TypeScript, Python, SQL, Java, C, Swift

Financial & Domain: Equipment & lease finance, amortization math (TValue-validated), subsidy & blended-rate modeling, credit scorecards

Backend & Web: Next.js, React, Node.js, FastAPI, Prisma, Tailwind, PostgreSQL (Neon), Redis, Vercel, REST APIs

AI / Agentic: Multi-agent orchestration, RAG + local LLM serving (Ollama), Whisper, TDD, CI/CD

EDUCATION

McMaster University

Hamilton, ON

MEng, Computing & Software (in progress; Year 1 complete, A+ in Simple Type Theory)

Sept. 2025 – Dec. 2026

McMaster University

Hamilton, ON

BASc (Honours), Computer Science

Sept. 2018 – Nov. 2024
